JAPAN COAST GUARD
Mobile Cooperation Team

Capacity Building Support for the Djibouti Coast Guard (Overview)

1 Schedule
September 25th (Fri) ～October 2nd (Fri), 2026

2 Location
Republic of Djibouti(Djibouti)

3 Dispatched Staff
2 Mobile Cooperation Team （MCT） members

4 Participants
Djibouti Coast Guard (DCG) and others (35 participants)

5 Overview
The MCT provided capacity-building support to the DCG and others through the framework of the International Organization for Migration (IOM) regarding search and rescue operations in the event of a mass rescue accident at sea.
The training included a workshop on search and rescue procedures, ropework, casualty transportation techniques, and the handling of rescue equipment to improve basic operational skills. In addition, a comprehensive scenario-based exercise was conducted in which the DCG and other relevant organizations, including local authorities, worked together to carry out a series of coordinated activities, including rescue operations at sea, triage of rescued persons ashore, cardiopulmonary resuscitation (CPR), and the communication of information on the condition of rescued persons to relevant organizations.
The Japan Coast Guard will continue to strengthen cooperation and collaboration with the coast guard agencies of other countries to realize a Free and Open Indo-Pacific (FOIP), while supporting capacity-building efforts for countries in the Indo-Pacific region.
